

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I was very excited when I heard about Indiana's privacy law and eagerly signed up. It has made my time spent at home much more enjoyable. If the phone rings, it is someone I want to talk to, not someone trying to sell me something I don't want and wasting both our time. I already get 3-4 unwanted credit card preapproved applications in the mail, maybe you could focus on this lack of privacy and waste of resources. Thank you for your consideration of this matter.
